Where We Stand: Ontario's Ranking in Public Service and Health Care Revenues, Expenditures & Cuts

Ontario's government is making budget choices that cut and privatize public services and health care. These are choices, not necessities. Here's how we compare relative to other provinces and jurisdictions on some key measures.

The Notable Trends Are:

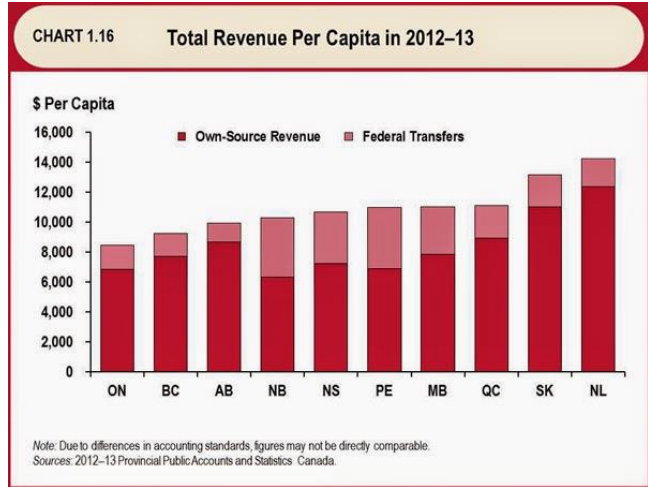

1. Ontario has dropped to last in Canada for funding all public services (Chart 1).
2. Ontario ranks last in Canada for total revenue per person (taxes and transfers) (Chart 2).
3. Ontario ranks at the bottom of the country for public health care funding per person compared to the other provinces (Chart 3).
4. Ontario ranks at the bottom of the country for public health care funding as a percentage of provincial GDP, compared to the other provinces (Chart 4).
5. Ontario health funding is shrinking as a proportion of the provincial budget, and has been for years (Chart 5).
6. Ontario ranks at the bottom of the country for public hospital funding per person, neck-and-neck with Quebec (Chart 6).
7. Ontario ranks 8th out of 10 provinces for hospital funding as a percentage of provincial GDP (Chart 7).
8. Ontario ranks last in Canada for number of hospital beds (Chart 8).
9. Ontario is fourth from the bottom of all OECD countries for number of hospital beds per 1000 population (Chart 9).
10. Ontario funds home care less per client than in 2002/2003 (Chart 10).
