

## Four Commitments to Improve Public Health Care

### 1. Renew the Canada Health Accord

Commit to improving the federal government's share of health funding, don't & download it onto the provinces.

### 2. Stop privatization & 2-tier charges for patients

Stop private clinics that undermine single-tier health care. Our money is better spent on care not profiteering.

### 3. Create a public drug program

A public drug program would better control too-high drug prices and put money towards safer, needed medications.

### 4. Improve seniors' care

Build a plan to meet the chronic care and longer term care needs of seniors & other Canadians, don't cut care for those most in need.

**It's easy to help protect & improve public health care for Canadians!** (check the boxes)

- I'll ask my candidates to make these commitments
- I'll volunteer with my local Health Coalition
- I'll hand out flyers and postcards in my neighbourhood

**Yes! Keep me informed about protecting public health care**
