

Ontario Health Coalition

COVID-19 Outbreaks in Non-Healthcare Settings

Updated to: November 18 2020, Released on November 30, 2020

Introduction

As Ontario introduces new measures to try to minimize the spread of COVID-19 with Peel and Toronto entering lockdown and Hamilton, Waterloo, Durham, Halton and York enforcing stricter regulations, it is important to evaluate the spread of the disease among our community and non-health care workplaces in the weeks leading up to the lockdown on November 23. This report looks at outbreaks in non-health care settings through the first three weeks of November. (We regularly issue a separate report on outbreaks in health care settings which is available on our website here along with the previous reports dating back through the pandemic for both health and non-health care settings: <https://www.ontariohealthcoalition.ca/index.php/resources-analysis/covid-19-resources-analysis-of-the-ford-governments-response/>.) In this period (October 31 to November 18) the spread of COVID-19 significantly worsened. The numbers of people infected in workplace outbreaks far exceeds the general community spread of the virus in the following workplace sectors: construction; schools and daycares; retail, restaurants and entertainment; and public services.

From October 31st to November 18th, cases among the general population increased 22.97% and daily cases had reached a new high at the end of October with a rolling seven-day average of 878 per day¹. That record has been broken and we are now seeing the highest rate of spread ever. For the week of November 18th, the rolling average is sitting at 1,369 per day². Due to the way that the provincial government has chosen to define school outbreaks, Public Health has reported an 18% increase in cases in workplaces (excluding health care settings) during this time period. However, that percentage only included an increase of 573 cases (for a cumulative total to date of 843) among schools and childcare settings (as per their definition of outbreak). The province's tracking of actual cases in schools shows an increase of 1865 cases (for a cumulative total to date of 4,265 cases) among students and education workers as well 639 cases in childcare settings in this period. Using the increase in the total numbers in schools, we calculate an increase of 39.74% cases in non-health care industries overall in this three-week period (October 31 – November 18). Using the increase in the total numbers in schools, we calculate an increase of 39.74% cases in non-health care industries overall in this three-week period (October 31 – November 18). Among the highest growth rates in COVID-positive cases we found in workplaces, there was a large outbreak in a construction site in Waterloo, which increased the relatively small number of cases we had tracked in construction by 220%. Aside from this, the biggest growth in cases is in schools and childcare settings where they increased 86.9%; followed by retail, restaurants and entertainment which increased 71.65%; and public services which increased 39.14%. This data is footnoted in the chart below.

Deaths among workplace outbreaks are not included in the provincial epidemiologic data and are not reported unless media find them through another method. We are deeply saddened to report two new deaths among workers in non-health care settings with the death of a child and youth worker

¹ Davidson, Sean. Ontario Hits Highest Seven Day Average of COVID-19 since the Pandemic Began. CTV News. October 26 2020. <https://toronto.ctvnews.ca/ontario-hits-highest-seven-day-average-of-covid-19-cases-since-pandemic-began-1.5160872>

² Wilson, Codi. Ford warns 'tough' measures coming for COVID-19 hot spots as province reports another 1,210 cases, 28 deaths. CP24. November 19 2020. <https://www.cp24.com/news/ford-warns-tough-measures-coming-for-covid-19-hot-spots-as-province-reports-another-1-210-cases-28-deaths-1.5195858>

employed by the Toronto District School Board³ as well as the death of Renato Battisti, a cook aboard a chemical tanker docked in Sarnia after an outbreak occurred on board.⁴ There are undoubtedly many more that are not publicly known.

Cases in schools continue to outpace the rate of infection in the general public at an alarming rate, and the definition of school outbreak (two or more cases among students or staff with a proven epi-link) underrepresents the issue. There are high numbers of students in classrooms and multiple shared spaces such as bathrooms, recess spaces, school buses. Thus, the low numbers of cases categorized as “outbreaks” among the high number of actual school cases each week may be misleading the public about the growth of COVID-19 among school children and education workers. Since the opening of schools, the number of people who contracted COVID-19 in school and childcare outbreaks included 843 cases (as per their definition of outbreak). As noted above, looking at provincial tracking of actual cases in schools we found 3,626 cases among students and education workers as well 639 cases in childcare settings.

As of the publication of this report, the province and most local Public Health Units are still not reporting the names of businesses with outbreaks. This has contributed to false claims that there is no evidence of transmission in restaurants, retail and entertainment industries. In fact, the number of cases in this sector has increased by 71.65%, far above the number of cases in workplace outbreaks overall, which we found in this period (October 31 – November 18) to be 39.74%. Only the Hamilton Public Health Unit is reporting the names of all businesses with outbreaks. Shoppers Drug Mart is voluntarily reporting, and it has reported there were 35 cases in Shoppers Drug Marts, primarily in COVID hotspots, from October 31- November 18 and while writing this report, there have been 19 cases in the last five days from November 21-26⁵. The LCBO which has reported 3 cases during the same reporting period⁶.

Additionally, Ontario’s Premier Doug Ford has also announced that he plans on pushing the federal government to lift the requirement for two-week quarantine after international travel, stating that he would go forward with implementing a replacement protocol if he is unable to get support from Prime Minister Trudeau.⁷ It is important to note that 80% of travellers who have entered Canada have been exempt from the two week quarantine as exemptions were made for truck drivers, emergency response personnel and flight services.⁸ During the first wave of COVID-19, tragically, 10

Toronto Pearson Limo Driver's passed away from COVID-19 (6 of them were confirmed positive and 4 of them were suspected).⁹

The lack of clear, accessible public data on where transmission is occurring continues to be a problem but the Institute of Clinical Evaluative Sciences (ICES) has released a very useful COVID-19 Dashboard where Ontarians can search their postal codes test positivity and testing rate, accessible here : <https://www.ices.on.ca/DAS/AHRQ/COVID-19-Dashboard>. At November 25, they report that the Public Health Units with the highest percent positivity rates are: Peel (10.2%), Toronto (6%), York (5.8%), Windsor-Essex (4%), Halton (3.6%), Waterloo (3.5%) and Durham (3.3%). They have also shown that there is a significant variance among neighbourhoods, with four postal codes in Peel and three in Toronto with 15-20 % test positivity¹⁰. To put this into perspective, New York, which was one of the worst hit areas in North America during the first wave, has seen positivity rates in the 2.5-3% range and in keeping with international standards, if the positivity rate exceeds the tipping point of 3%, New York will close schools, go into virtual learning and be in lockdown.¹¹

During the week of this report, 35.4%¹² of COVID-19 cases had not been traced back to a source. These unknown exposure sources have been increasing during the second wave as public health units in hotspots have been unable to keep up with contact tracing¹³. The auditor general's report revealed that in the period of her study it took Toronto 4 days to contact someone after testing positive for COVID-19, Ottawa 4.5 Days, Peel 3.25 Days and York 2.25 Days, during which time there is potential for further spread of the virus.¹⁴ We are calling on the Ford government to give Public Health adequate resources to contact trace and quarantine effectively and to provide transparent reporting so that Ontarians can make informed decisions about their health.

Chart 1. Public Health Ontario's Reported COVID-19 Outbreaks in Non-Health Care Industries

(This chart shows the number of reported outbreaks in Ontario as reported by Public Health Ontario, broken down by industry. Workplaces are considered agricultural, retail and food processing public services, manufacturing)¹⁵¹⁶

Industry	Number of Active Outbreaks Nov. 18	Cumulative Outbreaks	Cumulative Cases to Oct. 31	Cumulative Cases to Nov. 18
Shelters	12	70	624	640
Corrections	2	9	124	125
Group Homes	29	191	791	1,021
Workplaces (agricultural, retail, food processing, public services, manufacturing)	235	730	3,918	4,422
Daycare and Schools*	139	376	520	843
Total	417	1,376	5,977	7,051

*Public Health Ontario is now reporting some cases associated with school outbreaks, however their definition of a school outbreak requires a known epi link (same class or direct contact) and does not reflect the number of cases in schools even when there are multiple cases in the same school.

Chart 2. COVID-19 Ontario Health Coalition's Tracking of Cases by Industry & Regions Impacted

(This chart shows the cumulative cases the Ontario Health Coalition has been able to find in each industry and which regions have had outbreaks in that industry)

Industry	Cumulative Cases October 28	Regions/Towns Impacted	Cumulative Cases November 18

Total	6,947		9,708

This total includes cases that we had previously tracked plus all of the cases that the province is reporting since September. We have also included outbreaks in faith schools, administrative offices, student residences and private schools in our total.

Agriculture

Deaths of Three Migrant Workers:

1. On May 30, Bonifacio Eugenio-Romero, a 31-year old migrant worker from central Mexico, became the first foreign agricultural worker to die in Ontario from COVID-19. Eugenio-Romero had been in the country since early April and worked for Woodside Greenhouses Inc. in Kingsville, Ontario.
2. On June 5, a second worker, 24-year-old Rogelio Muñoz Santos, who also worked on a farm in Windsor-Essex died from COVID-19.
3. Fifty-five-year-old Juan Chaparro had been coming to Canada to work since 2010 and was employed at Norfolk County's Scotlynn Group farm, where there has been a cluster outbreak of COVID-19. He is the third migrant worker to die this month after contracting COVID-19. The two others died in the Windsor area.¹⁷

London/St Thomas:

London-Ontario Plants Propagation facility: May 29 2020

Eight migrant workers at the Ontario Plants Propagation facility outside of St. Thomas have tested positive for COVID-19. The workers live in London but travel to the operation at 38024 John Wise Line.¹⁸

London-Ontario Plants Propagation facility: July 8 2020

Twenty migrant workers at the Ontario Plants Propagation facility outside of St. Thomas have tested positive for COVID-19. Two agriculture workers have also tested positive for COVID-19. The workers live in London but travel to the operation at 38024 John Wise Line.¹⁹

Elgin County- Martin Family Fruit Farms: November 3 2020

There have been 40 cases of COVID-19 among the Migrant Agricultural Workers at Martin Family Fruit Farms.²⁰

Haldimand Norfolk:

Haldimand Norfolk-Scotlynn Group: June 25 2020

Approximately 220 migrant farm workers live in residences on the farm. Approximately 200 people have tested positive. Two workers are currently hospitalized.²¹

Haldimand Norfolk-Schuyler Farms: November 16 2020

An outbreak has been declared at Shuyler Farms with 13 cases of COVID-19 among their Migrant Agricultural Farm Workers.²²

Windsor Essex and Niagara:

June 9 2020

It is estimated that there have been 400 agriculture and food workers who have tested positive in the Windsor, Essex, and Niagara region. There have also been two Mexican migrant workers who have passed away from COVID-19 and 2 more who are currently in Intensive Care. The Windsor Essex Public Health Unit reported 43 new cases on June 9th 2020, which was the highest spike since the disease peaked in mid-April. There have also been 34 more COVID-19 cases in the town of Leamington which hosts over 8,000 migrant workers, who live in communal housing and work together closely without proper access to PPE. There have been 17 farms with COVID-19 outbreaks, but the Public Health Units are not releasing their names. The worst outbreaks have been at Greenhill Produce in Kentbridge, Scotlynn Group in Norfolk County and Ontario Plants Propagation of St Thomas.²³

Niagara:

Pioneer Flower Farms: June 4 2020

St. Catharines greenhouse, Pioneer Flower Farms, has become the site of the single largest jump in local COVID-19 cases since the pandemic hit Niagara in March. 60 workers have been placed in isolation of which 40 have tested positive.²⁴

²⁰ Dubinski, Kate. 40 workers at Elgin County orchard test positive for COVID-19. CBC November 3 2020 <https://www.cbc.ca/news/canada/london/elgin-farm-covid-1.5788053>

Pioneer Flower Farms: July 10 2020

Pioneer Flower Farms had at least 65 workers test positive for COVID-19, increasing by 5 since the early reports of the outbreak in June. ²⁵

Lincoln Flower Farm: November 10 2020

There have been 45 cases of COVID-19 among agricultural farm workers. ²⁶

Windsor Essex

June 29 2020

The health unit says a total of 674 agri-farm workers have tested positive for the virus in the region. Six workplaces in the agriculture sector are in outbreak status – four in Leamington and two in Kingsville. ²⁷ Nature Fresh in Leamington has had 191 cases of COVID-19 in their agriculture migrant workforce over this weekend. ²⁸

July 14 2020

The health unit says a total of 824 agri-farm workers have tested positive for the virus in the region (an increase of 150 since June 29). ²⁹

Leamington & Kingsville Agricultural Facilities: July 7 2020

The COVID-19 outbreaks at two agricultural facilities in Leamington and two agricultural facilities in Kingsville continue. ³⁰

August 25 2020

The health unit says a total of 1170 agri-farm workers have tested positive for the virus in the region (an increase of 346 since July 14). There are currently two active outbreaks in agriculture facilities in Leamington ³¹

September 17 2020

The health unit says a total of 1176 agri-farm workers have tested positive for the virus in the region (an increase of 6 since August 25). There no outbreaks reported in Windsor Essex.³²

October 15 2020

The health unit says a total of 1200 agri-farm workers have tested positive for the virus in the region (an increase of 24 since September 17). There is one farm with an active outbreak in the region with 17 reported cases involved in the outbreak.^{33 34}

November 18 2020

One agricultural workplace outbreak was reported in the municipality of Leamington by the Windsor-Essex Public Health Unit. The total number of cases reported in the area is now at 1262, an increase of 62.³⁵

Chatham Kent

Greenhill Produce: June 15 2020

An outbreak was investigated at the end of April with 40 agricultural workers testing positive for COVID-19 at Greenhill Produce.³⁶

Greenhill Produce: July 2 2020

The outbreak at Greenhill Produce has grown to 103 cases in their workers but has now been resolved.³⁷

Chatham-Kent Agricultural Industry: August 25 2020

The Chatham-Kent Public Health Unit has reported 108 Temporary Foreign Workers and 130 Farm Workers have tested positive for COVID-19³⁸

Chatham-Kent Agricultural Industry: September 17 2020

The Chatham-Kent Public Health Unit has reported 112 Temporary Foreign Workers and 129 Farm Workers have tested positive for COVID-19.³⁹

Chatham-Kent Agricultural Industry: October 15 2020

The Chatham-Kent Public Health Unit has reported 111 Temporary Foreign Workers and 133 Farm Workers have tested positive for COVID-19.⁴⁰

Chatham-Kent Agricultural Industry: November 18 2020

The Chatham-Kent Public Health Unit has reported 112 Temporary Foreign Workers and 146 Farm Workers have tested positive for COVID-19 an increase of 14. ⁴¹

Simcoe-Muskoka:

Two Unidentified Farms: June 17 2020

Two outbreaks have been declared in Simcoe County with one farm having 9 cases in their workers and the other farm having 3 workers test positive for COVID-19. ⁴²

Vaughan:

Ravine Mushroom Farm: July 6 2020

There have been 30 confirmed cases of COVID-19 among agricultural workers at the Ravine Mushroom Farm in Vaughan. ⁴³

Food Processing

Brampton:

Maple Lodge Farms: May 7 2020

Maple Lodge Farms in Brampton have had 25 workers test positive for COVID-19 and one worker has passed away from the virus. Maple Lodge Farms is being criticized for failing to report their first positive case for over three weeks. ⁴⁴ As of June 8 2020, Maple Lodge Farms has reported that they have not had a new case of COVID-19 in their facilities for three weeks. ⁴⁵

Food Processing Plant: November 18 2020

Two outbreaks at two undisclosed food processing plants in Brampton with 18 cases attached to the outbreak. ⁴⁶

Kitchener:

Conestoga Meat: May 22 2020

Conestoga Meat in Kitchener had to close production for a time in order to contain their COVID-19 outbreak. To date they have had 91 workers at their Breslau plant test positive for COVID-19, however 71 of those cases are now resolved. ⁴⁷
