

OTE HEALTH CARE

This election is about the economy. It matters.

But don't forget, there's no economy for you if you have to spend all your savings to pay for your surgery or your cancer drugs.

These things should never happen in Canada. We have Public Medicare laws to protect us from user fees. But they are happening & they must be stopped.

Learn more & please make health care part of how you vote on April 28 >>

OTE HEALTH CARE

This election is about the economy. It matters.

But don't forget, there's no economy for you if you have to spend all your savings to pay for your surgery or your cancer drugs.

These things should never happen in Canada. We have Public Medicare laws to protect us from user fees. But they are happening & they must be stopped.

Ask your federal candidate to make these four commitments that Canadians need:

1. Enforce the Canada Health Act

Protect patients from user fees being charged by for-profit surgical clinics. The federal government must uphold the Canada Health Act that bans such user fees & enforce it.

2. Stop for profit health care & seniors' care

Our public tax dollars for health care should go to care for patients not to profits. For-profit clinics & long-term care corporations take money out of our health care for profit rather than using it for care.

3. Protect & expand Pharmacare – our public drug program

Protect & expand our public drug coverage–don't cut it. It saves us all money by bulk buying & public (not-for-profit) insurance.

4. Protect & expand dental care coverage

Canada's new dental care plan covers basic dental care for seniors. Our federal government must keep that program & expand it to more age groups – not cut it.
