# 2019

Ontario has the lowest revenues per person of any province in Canada

### Ontario Revenues Collected Per Capita to Fund Our Social Programs Most Recent Data (2017)

- Ontario collects \$10,415 per capita – or per person – to fund all our social programs including health care and education.
- The average of the rest of the country is \$12,373 per capita.
- If Ontario was to boost revenues to match the average of the other provinces, we would have \$1,958 more per person x 14 million population (2017)  
= \$27.4 billion more in total to fund our social programs.
