

Ask your federal candidate to make these four commitments that Canadians need:

1. Enforce the Canada Health Act

Protect patients from user fees being charged by for-profit surgical clinics. The federal government must uphold the Canada Health Act that bans such user fees & enforce it.

2. Stop for profit health care & seniors' care

Our public tax dollars for health care should go to care for patients not to profits. For-profit clinics & long-term care corporations take money out of our health care for profit rather than using it for care.

3. Protect & expand Pharmacare – our public drug program

Protect & expand our public drug coverage—don't cut it. It saves us all money by bulk buying & public (not-for-profit) insurance.

4. Protect & expand dental care coverage

Canada's new dental care plan covers basic dental care for seniors. Our federal government must keep that program & expand it to more age groups – not cut it.
